SECURE A PERMANENT WHITE MAJORITY

The United States of America will be declared an outpost of Western civilization and a state dedicated to its European-heritage population and their posterity. It will be the policy of the state to set immigration and natal policy that will ensure a permanent European majority. The rights of historic minority populations will be respected.

The Founding Fathers created our nation with the intention of building a homeland for wayward Europeans. This was accomplished through two hundred years of back-breaking labor, bloodshed, and struggle – adversities largely shouldered by generation after generation of Europe's sons and daughters. In recent years, immigration policies favoring non-White demographics have eroded what was once a strong sense of European identity amongst America's White population. This erosion serves the interests of America's political and economic elite, who understand that a divided citizenry is easier to manipulate and control.

On November 27, 2021, the National Justice Party staged a protest against the government and media coverup of the brutal anti-White terror attack in Waukesha, Wisconsin

EQUAL RIGHTS FOR THE WHITE MAJORITY

We demand the extension of the 1964 Civil Rights Act to provide equal protections and privileges to the White majority, or the act must be repealed.

“**ALL THAT WE IN THE NJP ARE DEMANDING IS FOR THE MAJORITY TO HAVE A SAY OVER THEIR COUNTRY.**”

—JOSEPH JORDAN—

Despite the legal wording of the 1964 Civil Rights Act, there is an obvious double standard when it comes to its real world application in job opportunities, career advancement, government assistance, and admission to schools. Whites disproportionately bear the burden of the legislation's many failures, and many core aspects of the act are deliberately undermined. Rather than remedy the act's failures, the system 'justifies' them through further legislation such as Affirmative Action.

SUPPORT OF PRIVATE PROPERTY RIGHTS

We support private property rights, including a program to make home ownership more accessible to stably employed family men. Small businesses and communities will be granted the right to refuse service or home ownership to anyone for any reason they see fit.

WE AIM TO MAKE HOME OWNERSHIP AN ATTAINABLE REALITY FOR YOUNG WHITE AMERICANS

For many Americans, the dream of owning a home and the land around it has never been more distant in the history of our nation. Home ownership, despite being a core tenet of the mythical “American Dream,” has become unattainable to most young White Americans looking to plant their roots. A number of factors contribute to this reality, such as the acquisition of vast numbers of single family homes by Wall Street financiers. Real estate speculators are often able to pay for homes in cash and can usually outbid young families by a significant margin.

In addition to this, private landlords are deadlocked by harmful legislation that removes their ability to selectively rent their carefully maintained properties – opening them up to exploitation and damage by minority populations that rarely pay rent on time and more often than not inflict damage on their investment.
